SUMMARY

Cybersecurity graduate with 6 months of hands-on experience in penetration testing, vulnerability assessment, and OSINT, gained through an authorized pentest on live production infrastructure. Skilled with Nmap, Burp Suite, OWASP ZAP, SQLMap, and Nuclei to find, validate, and document real security risks in structured reports. Also hold the Google Cybersecurity Certificate and have completed Cisco's CCNA course. Looking for an entry-level VAPT, SOC analyst, or security analyst roles where I can keep building technical depth.

SKILLS

Offensive Security: Penetration Testing, Vulnerability Assessment, OSINT and Reconnaissance, SQL Injection Testing, Cross Site Scripting (XSS)

Tools: Nmap, Nikto, Gobuster, OWASP ZAP, SQLMap, XSStrike, Nuclei, Sn1per, TheHarvester, Burp Suite Professional (Basics)

Defensive Security: SIEM Fundamentals, Log Analysis, Incident Response, Threat Detection and Analysis, Network Security, Firewalls

Other: Python, Linux and Windows Environments, Troubleshooting and Analytical Skills, Security Documentation and Reporting

EXPERIENCE

Cybersecurity Intern — UptoSkills (Remote) **04/2026 – 07/2026**

- Conducted a 12-phase authorized penetration test on live production infrastructure, identifying 28 security findings (3 Critical, 3 High, 7 Medium, 15 Low/Informational), all remediated post-disclosure.
- Discovered and reported a Critical RCE vulnerability (CVSS 9.1), an unauthenticated monitoring endpoint exposing full internal infrastructure topology, and a publicly accessible configuration file risking cloud credential exposure.
- Performed reconnaissance and OSINT using **Masscan**, **Shodan**, **Censys**, **Wappalyzer**, **Google Dorking**, and **Wayback Machine** to map external attack surface and subdomains.
- Ran network and web application scans using **Nmap**, **Nikto**, **Gobuster**, and **OWASP ZAP** to identify open ports, misconfigurations, and hidden directories.
- Tested for injection and scripting vulnerabilities using **SQLMap** and **XSStrike**, and automated recon and multi-tool assessment using **TheHarvester**, **Nuclei**, and **Sn1per**.
- Documented all findings in structured technical reports and presented them in live vivas with supervisor review.

Cybersecurity Intern — Unified Mentor (Remote) **11/2025 – 02/2026**

- Built a Python-based threat intelligence aggregator to collect and normalize indicators of compromise (IPs, domains, URLs, hashes) from multiple sources.
- Conducted static and dynamic analysis of suspicious files, including malicious PDF samples, to identify embedded scripts and assess potential security risks.
- Developed scripts to monitor Windows registry changes and running processes, enabling timely detection of abnormal system activity.
- Documented analysis findings and investigation results in structured technical reports, enhancing clarity and supporting future investigations.

HANDS-ON LABS AND PROJECTS

- **Phishing Detection Website using Machine Learning (Capstone, group project):** Developed a web-based phishing detection system using machine learning techniques to identify malicious URLs and protect users from phishing attacks.
- Completed 6 SQL injection labs on PortSwigger Web Security Academy, covering in-band, blind, and out-of-band SQLi techniques across multiple database backends.

- Applied incident response playbooks and conducted log analysis and threat detection in SIEM labs as part of the Google Cybersecurity Certificate, identifying suspicious activity and indicators of compromise.
- Completed foundational labs in TryHackMe's Pre Security path, covering networking basics, web fundamentals, and core security concepts.
- Completed all labs under Cisco Networking Academy's CCNA course, covering IP addressing, routing and switching, network security, and troubleshooting.

EDUCATION

B.Sc. (Hons.) in Computer Science with specialization in Cybersecurity **2026**

Galgotias University, Greater Noida | CGPA: 8.2

Class XII (PCM), CBSE, 2023: 78% | Class X, CBSE, 2021: 93.8%

Relevant Coursework: Network Security, Cryptography, Computer Networks, Operating Systems, Python Programming, Data Structures, Cybersecurity Fundamentals

CERTIFICATIONS

- Network Security, Cisco, 2026
- Google Cybersecurity Certificate, Coursera, 2025
- Introduction to Cybersecurity, Cisco Networking Academy, 2025
- Cisco Certified Network Associate (CCNA) Course, Cisco Networking Academy, 2025
- Python for Data Science, IBM, 2023
- Multiple NPTEL online certification courses through university learning programs

LANGUAGES

English: Proficient | Hindi: Native
