

TANISHA SAGAR

SUMMARY

Cybersecurity graduate with 6 months of hands-on experience in penetration testing, vulnerability assessment, and OSINT, gained through an authorized pentest on live production infrastructure. Skilled with Nmap, Burp Suite, OWASP ZAP, SQLMap, and Nuclei to find, validate, and document real security risks in structured reports. Also hold the Google Cybersecurity Certificate and have completed Cisco's CCNA course. Looking for an entry-level VAPT or penetration testing role where I can keep building technical depth.

EXPERIENCE (6 Months)

Cybersecurity Intern, 04/2026 - 07/2026

UptoSkills - Remote

- Conducted an authorized penetration test on live production infrastructure across 12 structured tasks, covering reconnaissance, scanning, exploitation, and automation phases.
- Performed reconnaissance and OSINT using **Masscan**, **Shodan**, **Censys**, **Wappalizer**, **Google Dorking**, and **Wayback Machine** to map external attack surface and subdomains.
- Ran network and web application scans using **Nmap**, **Nikto**, **Gobuster**, and **OWASP ZAP** to identify open ports, misconfigurations, and hidden directories.
- Tested for injection and scripting vulnerabilities using **SQLMap** and **XSSStrike**, and automated recon and multi tool assessment using **TheHarvester**, **Nuclei**, and **Sn1per**.
- Identified and reported real security issues, including exposed monitoring dashboards and information disclosure through response headers, documented in structured technical reports and presented in live vivas with supervisor review.

Cybersecurity Intern, 11/2025 - 02/2026

Unified Mentor - Remote

- Built a Python-based threat intelligence aggregator to collect and normalize indicator of compromise (IPs, domains, URLs, hashes) from multiple sources.
- Conducted static and dynamic analysis of suspicious files, including malicious PDF samples, to identify embedded scripts and assess potential security risks.
- Developed scripts to monitor Windows registry changes and running processes, enabling timely detection of abnormal system activity.
- Documented analysis findings and investigation results in structured technical reports, enhancing clarity and supporting future investigations.

EDUCATION

B.Sc. (Hons.) in Computer Science with specialization in Cybersecurity, 2026
Galgotias University - Greater Noida
CGPA: 8.2

Class XII (PCM), CBSE, 2023
Percentage: 78%

Class X, CBSE, 2021
Percentage: 93.8%

CONTACT

Address: New Delhi, India 110096

SKILLS

- Penetration Testing
- Vulnerability Assessment
- SIEM Fundamentals
- Log Analysis
- Incident Response
- Network Security
- OSINT and Reconnaissance
- SQL Injection Testing
- Cross Site Scripting (XSS)
- Nmap, Nikto, Gobuster
- OWASP ZAP, SQLMap, XSSStrike
- Nuclei, Sn1per, TheHarvester
- Burp Suite Professional Basics
- Firewalls
- Threat Detection and Analysis
- Linux and Windows Environments
- Troubleshooting and Analytical Skills
- Security Documentation and Reporting

ACADEMIC PROJECTS

Phishing Detection Website using Machine Learning - Developed a web-based phishing detection system as a capstone group project using machine learning techniques to identify malicious URLs and protect users from phishing attacks.

RELEVANT COURSEWORK

Network Security, Cryptography, Computer Networks, Operating Systems, Python Programming, Data Structures, Cybersecurity Fundamentals

ADDITIONAL LEARNING

Completed multiple NPTEL online certification courses through university learning programs.

CERTIFICATIONS

Network Security, Cisco 2026;
Google Cybersecurity Certificate, Coursera, 2025;
Introduction to Cybersecurity, Cisco Networking Academy, 2025;
Cisco Certified Network Associate (CCNA) Course, Cisco Networking Academy 2025;
Python for Data Science, IBM, 2023;

HANDS-ON LABS AND PROJECTS

- Completed 6 SQL injection labs on PortSwigger Web Security Academy, covering in-band, blind, and out-of-band SQLi techniques across multiple database backends.
- Applied incident response playbooks and conducted log analysis and threat detection in SIEM labs as part of the Google Cybersecurity Certificate, identifying suspicious activity and indicators of compromise.
- Completed foundational labs in TryHackMe's Pre Security path, covering networking basics, web fundamentals, and core security concepts.
- Completed all labs under Cisco Networking Academy's CCNA course, covering IP addressing, routing and switching, network security, and troubleshooting.

LANGUAGES

English: Proficient
